

擁抱AI科技 N-Cloud7讓網路維運更輕鬆！

N-Cloud 7

導引式安裝指引，大幅縮短上線時間。

全新設計操作UI介面，查詢更簡易。

AI智慧助手N-Robot Chat：

為日常維運工作提供最佳建議！

新增SLA (服務等級協議) 統計分析功能

掌握多期間的網路品質變化。

◆ 數十款自動生成的Dashboard，從宏觀到微觀皆能掌握 ◆

加入AI技術後的N-Cloud 7

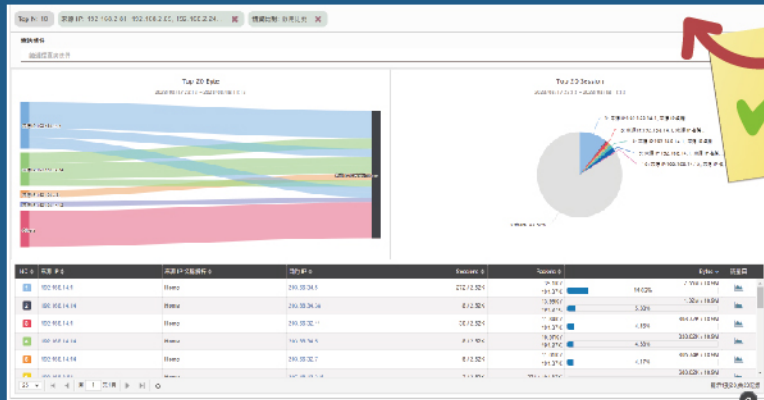

從一個『好工具』華麗蛻變成充滿智慧的『維運助理』

The screenshot shows the N-Cloud 7 interface with a chatbot named N-Robot. The chatbot is displaying a message about a locked account and failed login attempts. Handwritten annotations in Chinese highlight key features:

- 自動學習合理區間 省去人工設定告警值** (Automatically learn reasonable intervals, saving manual setting of alert values) - points to the 'Syslog' report generation button.
- 高效能擴容架構 數據量再多也能分析** (High-performance scalable architecture, can analyze data no matter how much) - points to the data table.
- 互動式對話 一步步帶領障礙定位與排除** (Interactive dialogue, step-by-step leading to fault location and elimination) - points to the chatbot's response.

The chatbot message reads: "被鎖定的帳號，來自哪個IP？" (Which IP is the locked account from?) and "登入失敗排名在前幾名的帳號其來源IP顯示是來自內部，使用這幾個IP的設備存在著風險，建議執行下一步行動。" (The top ranked failed login accounts show their source IP is from internal, devices using these IP addresses are at risk, it is recommended to take the next step).

Buttons below the chatbot include: "IP軌跡查詢", "告訴我前10名連線情資的名單", "將IP加入黑名單", and "輸入訊息".

內建涵蓋網路品質與資安狀態豐富圖表

數十款Dashboard樣板 編輯專屬的戰情中心
